

FCC Statement

This device complies with part 15 of FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction guide, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult a service representative for help.

Properly shielded and grounded cables and connectors must be used in order to comply with FCC emission limits. LifeVWorks is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

system requirements

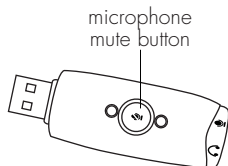

- Windows® 2000, XP or Windows Vista®
or
Mac® OS X v10.4 or later
- USB port (for digital audio)
or
3.5 mm (1/8") headphone output and microphone input

setup

1 • verify package contents

quick start guide
(in your hands right now)

USB audio adapter

LifeTalks USB foldable headset

2 • connect headset to computer

If you use the USB audio adapter and your computer does not automatically recognize it, see **Troubleshooting**.

3 • adjust headset and microphone volume

You can adjust the headset volume from your computer or with the volume control on the headset cable. You can also adjust the microphone volume on your computer.

Mute the microphone by pressing the microphone mute button on the USB audio adapter or using the switch on the headset cable. You can also mute the microphone using the volume controls on your computer.

To adjust the volume on your computer:

Windows XP: Click the volume icon in the system tray.

You can also adjust the volume by clicking **Start > Control Panel > Sounds, Speech, and Audio Devices**.

Windows Vista: Click the volume icon in the system tray.

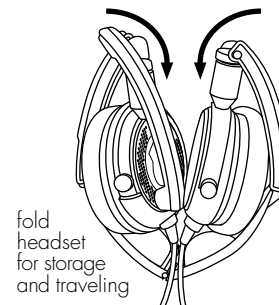

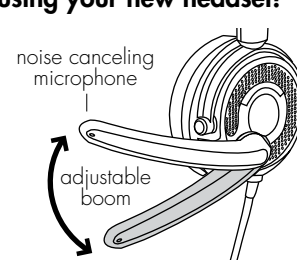

You can also adjust the volume by clicking **Start > Control Panel > Hardware and Sound**, then clicking **Adjust system volume** under **Sound**.

Mac OS X: Click the volume icon on the menu bar.

You can also adjust the volume by clicking the **Apple menu**, selecting **System Preferences**, then clicking **Sound**.

4 • start using your new headset!

troubleshooting

situation	try this
cannot hear audio	<ul style="list-style-type: none">• Ensure the green headphone connector is inserted properly into the headphone output.• Ensure mute is off on the computer, the USB audio adapter and the volume control on the headset cable. Adjust the output volume on the computer and the volume control on the headset.
microphone does not work	<ul style="list-style-type: none">• Ensure the pink microphone connector is inserted properly into the microphone input.• Ensure mute is off on the computer, the USB audio adapter and the volume control on the headset. Adjust the microphone volume on the computer.
headset does not work	<ul style="list-style-type: none">• Check that the USB audio adapter is connected to the computer.• Try a different USB port.• Try plugging the USB audio adapter into a USB port on the computer, not a USB hub.
computer does not recognize device	<ul style="list-style-type: none">• Windows XP: Go to Start > Control Panel > Sounds, Speech and Audio Devices > Sounds. Click Sounds and Audio Devices. Click the Audio tab, then select C-Media USB Headphone Set as the default device for sound playback and recording. Click OK.• Windows Vista: Go to Start > Control Panel > Hardware and Sound > Sound. Choose the Playback tab, then choose C-Media USB Headphone Set. Click Set Default. Next, select the Recording tab, then select C-Media USB Headphone Set. Click Set Default. Click OK.• Mac OS X: Click the Apple menu and select System Preferences, then click Sound. Select the Output tab, then select C-Media USB Headphone Set. Next, click the Input tab and select C-Media USB Headphone Set.
